COM-2022-043

Dear provider of healthcare-related services,

We all have important roles in the front lines of the 2019 coronavirus disease (COVID-19) pandemic that we are facing. As the COVID-19 pandemic continues to evolve, PharmPix is making every possible effort to continue to provide our essential services to assure the use of appropriate medications by the appropriate patients at the right time.

The Food and Drug Administration (FDA) authorized the emergency use of Novavax COVID-19 Vaccine, Adjuvanted for the prevention of COVID-19 caused by severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) in individuals 12 through 17 years of age. The primary series of Novavax COVID-19 Vaccine, Adjuvanted is two doses (0.5mL each) given 3 weeks apart.

This authorization is based on an ongoing pediatric expansion of its phase 3 clinical trial, which indicated a clinical efficacy of 78.29% in preventing SARS-CoV-2 infections (PCR-confirmed symptomatic mild, moderate, or severe COVID-19 from 7 days after dose 2). The pediatric trial data was obtained during a period in which the SARS-CoV-2 delta variant was the predominant strain in the United States.

Please refer to the following resources for more information:

1. [Novavax HCP Fact Sheet](#)
2. [FDA News Release: FDA Roundup](#)

The situation with the COVID-19 pandemic is dynamic and constantly changing. We strongly encourage the frequent revision of updated information provided by the FDA, the Centers for Disease and Control Prevention (CDC), and the World Health Organization (WHO), to assure that your practices are consistent with the most updated information.
